

## INTERMEDIATE AIR QUALITY SPECIALISTS

### Position

The Greater Vancouver (Burnaby) Office of Golder Associates is seeking an Intermediate Air Quality engineer/scientist to support our growing air quality and greenhouse gas services.

### Responsibilities

As a key member of the Atmospheric Services team, you will develop your skills by working closely with management and all business units. The responsibilities associated with this position include:

- Play a key role in the development, execution and completion of air quality assessment projects;
- Complete technical work in areas of expertise for various types of developments including mines, oil and gas facilities and other industrial operations;
- Manage intermediate to large size air quality assessments as a component of multi-disciplinary environmental assessments;
- Develop and maintain emission inventories;
- Ensure adherence with Golder's project management and QA/QC protocols;
- Prepare technical reports, proposals and other communications;
- Liaise with clients and regulators; and
- Supervise, train and mentor junior staff.

### Experience and Qualifications

Golder is a strong advocate of the team approach to undertaking projects and problem solving. Accordingly, the successful candidate will be expected to interface with and work on multi-disciplinary teams where the contribution of each member is valued. Areas of expertise should include but are not limited to the development of air emission inventories, dispersion modelling, meteorological data sets, air pollution control technologies, regulatory compliance and permitting, environmental impact assessments and ambient monitoring programs as related to industrial clients. The preferred candidate will possess the following:

- Graduate or post-graduate degree in environmental, chemical or mechanical engineering;
- Minimum 5 years of directly related experience in the environmental consulting business;
- Proven project management skills;
- Ability to thrive in an atmosphere that requires cooperation and team work to provide quality, solution-oriented consulting services;
- An understanding of federal and provincial laws and regulations pertaining to air quality issues;
- Familiarity with emission inventory techniques and preparation are extremely important;

## INTERMEDIATE AIR QUALITY SPECIALISTS

- Experience and knowledge in pollution prevention/control equipment and industrial processes is an asset;
- Experience with providing quality control and assurance on air emission estimation and data;
- Ability to apply theoretical principles to the solutions to new problems;
- Proven leadership skills and experience; and
- Strong interpersonal, communication and critical thinking skills.

Our Staff Benefit from:

- An option to purchase shares in Golder Associates
- Career and personal development opportunities and support of personal growth
