

SENIOR AIR QUALITY SPECIALISTS

Position

The Greater Vancouver (Burnaby) Office of Golder Associates is seeking a Senior Air Quality engineer/scientist to support our growing air quality and greenhouse gas services.

Responsibilities

The Greater Vancouver (Burnaby) Office of Golder Associates is seeking a Senior Air Quality engineer/scientist to support our growing air quality and greenhouse gas services. As a key member of the Atmospheric Services team, you will develop your skills by working closely with management and all business units.

The successful candidate will be involved in a broad range of responsibilities:

- Maintaining and further developing air quality services;
- Providing vision and direction as a member of the senior leadership team;
- Devising and implementing business and marketing strategies;
- Coordinating with other Golder offices offering air quality services;
- Developing and maintaining strong client relationships;
- Executing technical work in areas of expertise;
- Provide input and senior review on technical reports, proposals and communications;
- Participate in client meetings as well as regulatory meetings.

Experience and Qualifications

The preferred candidate will possess the following:

- Undergraduate degree, Masters or PhD in Engineering, Meteorology or Physics;
- Numerous years of experience in the environmental industry;
- Strong business development skills;
- Proven success developing and maintaining client relations;
- Ability to thrive in an atmosphere that requires cooperation and team work to provide quality, solution-oriented consulting services;
- Strong understanding of federal and provincial laws and regulations pertaining to air quality issues;
- Strong technical writing skills;
- Exceptional communication skill;

SENIOR AIR QUALITY SPECIALISTS

- Areas of expertise should include but are not limited to the development of air emission inventories, dispersion modelling, air pollution control technologies, regulatory compliance and permitting, environmental impact assessments, carbon management and ambient monitoring programs.
